ABOUT JOHNSON HARDWOOD

Johnson Hardwood is one of the leading manufacturers of premium hardwood flooring with distribution to the United States and Canada. We produce on-trend, high-demand flooring options by sourcing durable hardwood species from around the globe. Our products are recognized for their affordability and superior quality. Plus, we offer the highest standards of worry-free floors in the industry being CARB II and Lacey Act compliant. Each flooring plank is precision milled, hand crafted, and hand stained to produce an exquisite product. Johnson Hardwood floors are manufactured with the greatest care and backed by a warranty that assures complete satisfaction.

The Johnson Hardwood manufacturing process starts by sourcing wood species with grain patterns that flooring customers are looking for. Color and wood specie trends are researched by our product development team to create natural looking premium hardwood flooring options for our customers. From contemporary to traditional and dark wood to natural colors, we keep our customer interior design needs in mind by providing a wide variety of flooring options.

Whether exotic or domestic, Johnson Hardwood travels the globe in search of unique grain patterns, durable woods, and responsibly harvested trees. Harvested wood is cut into planks and hand carved for a custom floor look. Wood planks are then hand stained to ensure even coloring while allowing the natural wood color variation to come through. The finished product has the look of a custom hardwood floor while at an affordable price. Johnson Hardwood adheres to anti-dumping and sustainable tree harvesting practices with a commitment to preserving forest ecosystems.

ENGINEERED and SOLID HARDWOOD PRODUCT LINES

An Overview of Johnson's Engineered/Solid

LACEY ACT FOR RESPONSIBLE FORESTRY & SUSTAINABILITY

Johnson Hardwood aims to assure our customers that the Johnson Hardwood floor they've purchased comes from responsibly harvested forests. Johnson Hardwood sources hardwood from the U.S., China, Brazil, and Canada. Government regulations in all of these countries have become much more stringent over the last decade, and we fully support their efforts to protect their forests. China's Council for International Cooperation on Environment and Development regulates sustainable development through environmental policy and reform. There are Six National Key Forest Programs regulated by China's State Council that include the promotion of economic development, natural resource management and environmental protection, taxation and regulation of timber markets, and international trade and investment. To comply with global sustainability, Brazil adheres to forest certification as regulated by the Forest Stewardship Council. Canada's forest and lumber industry is regulated by the Canada Environmental Protection Agency. The United States, through the enactment of the Lacey Act, has helped other countries by preventing the importation of any hardwood product that is not legally harvested according to the rules of its country of origin. The Lacey Act requires end users of endangered wood to certify the legality of their supply chain all the way to the trees. If an importer knowingly imports tainted wood that has been illegally cut down for lumber then they will be raided by the Environmental Investigation Agency and dealt with by the U.S. Department of Justice.

CARB CERTIFIED FOR QUALITY ASSURANCE

It is part of the Johnson Hardwood manufacturing process to carefully craft and comply with the most stringent wood manufacturing regulations imposed in the United States. The most stringent standard being CARB compliant according to the California Environmental Protection Agency. CARB refers to the California Air Resources Board as governed by the California Environmental Protection Agency. CARB's mission is to promote and protect public health, welfare, and ecological resources through effective reduction of air pollution. Since January 1, 2009, manufacturers of wood products are required to prove their products meet the established Airborne Toxic Control Measure (ATCM) that sets upper limits on formaldehyde emissions from composite wood products sold in California, and is the most stringent due to the emission caps where other standards are based on averages. To be compliant, Johnson Hardwood is required to provide documentation of compliance and label products accordingly. CARB II, effective January 1, 2011, has defined guidelines for the entire production process that includes the manufacturer, distributor and fabricator of wood products.

EMISSIONS STANDARDS FOR ENGINEERED WOOD PRODUCTS

Johnson Hardwood is dedicated to producing the highest quality wood products through sustainable and environmentally responsible practices. As part of this commitment, we ensure all our applicable products are certified under the Environmental Protection Agency's (EPA) regulations, including: hardwood plywood, composite panels, and particle board.

As of June 1, 2018, all composite wood products must be compliant with the EPA's Toxic Substance Control Act (TSCA) Title VI regulation. This certification and our compliance statements are also included all product packaging. The EPA established Title VI of TSCA to regulate the chemical emissions produced by three important composite wood products: hardwood plywood, medium-density fiberboard (MDF), and particle board. Read on to learn about Timber Products' compliance with the latest EPA regulations and industry best practices.

INTRODUCING

The GRAND CHATEAU Series

European Oak... Ultra-Modern Style and Flare.

Engineered
Hardwood

Encapsulating the sophistication and style of Europe, Johnson Hardwood's Grand Chateau Series ushers in a clean and simple elegance to any space. Sourcing from European Oak enables both wider and longer planks. While a modern, clean look and feel is obtained by simply relying on the wood grains' natural complexity and aesthetics – in turn complementing today's on-trend looks. Soft and unembellished taupes and richly detailed natural tans are achieved by mild whitewashing and administering a multi-hand-staining process. Crafted in random lengths and offered in 12 exquisite shades all evoking a modern simplicity, Johnson Hardwood will have you settling into your space with elegance and poise.

Textures

Bevel Edge

Hand Honed

- Handscraped
- Long-Lasting Durability
- 11 Step Aluminum Oxide

Our craftsmen have delicately scraped and hand honed this floor to resemble the look of Old English Pubs where friends, family and travelers gathered to relax and converse in a warm and inviting atmosphere. The long 7 foot planks give the look of times gone by.

We used a character grade maple to bring out the natural beauty of the wood grain, along with filled splits and knots for more of that old world look.

The Alehouse series puts emphasis on the details to create a totally unique flooring experience. A multi-layer, hand-staining process has been used to create an inner glow effect that darkens towards the timeworn plank edges. Due to the natural glow, the Alehouse series has high color variation. Our exclusive vintage surface treatment finish adds even more character for the look of a reclaimed, custom hardwood floor.

SPC PRODUCT LINES

An Overview of Johnson's SPC Rigid Core Luxury Vinyl Flooring

Many customers are interested in the hype of worry-free flooring that SPC offers, but what exactly is SPC? SPC flooring stands for Stone Plastic Composite (or Solid Polymer Core), and they are engineered luxury vinyl planks manufactured to resemble natural wood but at a lower price point and less maintenance than hardwood floors. At Johnson Hardwood, our SPC floors are made with the following innovative technologies:

1. Protective wear layer for increased impact and wear resistance
2. Registered embossing (EIR) for a hyper-realistic wood texture
3. Unique printed design for real-looking wood details
4. WaterShield SPC Rigid Core for 100% waterproofing and increased durability
5. Underlayment for shock absorption and sound proofing
6. No glue, easy click installation
7. Phthalate, formaldehyde, and harmful chemical-free certifications

GREEN STORY

Green Guard Gold Certified - Help reduce indoor air pollution and chemical exposure.

Phthalate Free - Chemicals that damage the liver/kidneys/lungs/reproductive system.

INTRODUCING

The PUBLIC HOUSE Series

Breathtaking Visuals... Cheers to the 30mil Wear Layer!

Watershield SPC
Rigid Core

If you've loved our Alehouse engineered hardwood collection, you'll be ecstatic to find that our new Public House Series is the SPC counterpart to it. This series evokes rustic tavern charm and vintage speakeasy vibes by featuring eight rich colors ranging from warm taupes to dark browns - several of them being Alehouse Series colors highly rated by customers. As with all our SPC flooring, the Public House Series has all the beauty of real hardwood with all the benefits of SPC floors to give you a collection that withstands the bustle and joy of any lifestyle. You may want to raise your glass to it's 30mil Wear Layer too!

4 ALEHOUSE colors featured:
 Barley Ale = Highball
 Hefeweizen = Whiskey Sour
 Strawberry Blonde = Manhattan
 Doppelbock = Old Fashioned

pictured color - WHISKEY SOUR

STRENGTH...

Perfect Duet..

A seamless transition of flooring throughout the entire house.

Ever fall in love with hardwood flooring and wish that you could install it throughout the entire house? Now, you have the potential to install similar colored and styled flooring without worrying about common “splash zone” sections like the kitchen, laundry room, and bathroom. Johnson Hardwood’s Public House Series features highly rated engineered hardwood colors - several of them from the winner of “Surfaces Best of 2015 Style & Design” Alehouse Series. The Public House Series has all the beauty of real hardwood with all the benefits of SPC flooring. Innovative technology such as a thick 30-mil wear layer, our Watershield SPC Rigid Core Hybrid, and registered embossing (EIR), ensures durable, waterproof, and realistic low pattern-repeat flooring. These beautiful worry-free floors will match the bustle and joy of any lifestyle.

INTRODUCING

The SKYVIEW Series

Exceptional Visuals... 30mil Wear Layer!

WaterShield SPC
Rigid Core

For the young newlyweds that just bought a home. For the busy, working millennials that just don't have the time to upkeep their floors. For the hip coffee shop opening just around the corner. Whether it's petite apartments lofts or high-traffic commercial businesses, the new Skyview Series is the perfect blend of luxury, high-end style and easy, low-maintenance care. Wide planks with realistically embossed wood texture feature modern, trendy colors ranging from stormy grays to wheat tans. With the Skyview Series, you can be assured that your flooring is not only "Instagrammable" but also durable and waterproof -- did we mention it's 30mil Wear Layer!?

Sicily — the heart of the Mediterranean Sea. Johnson Hardwood's Sicily Collection reflects the island surrounded by alluring oceans and a rich history with its own diverse twist.

With multiple width planks that reach 6-foot lengths, this Rigid Core floor creates a magnificent visual with hyper-realistic wood images.

The collection is extremely durable as well as completely waterproof, utilizing our WaterShield SPC Rigid Core technology. Backed with our sound control underlayment made of IXPE foam, you'll be sure to enjoy the benefits of cushioning, shock absorption, and sound-proofing.

Installation is easy and secure, stable enough to hold and prevent moisture from seeping through by using the Valinge 2G's simple click and lock method.

Realistic Wood Details

- Multi-Length Planks
- Modern Design Aesthetics
- Commercial Space Applications

Johnson Hardwood's Bella Vista Series makes flooring the centerpiece of a beautiful home. This high performance floor is as durable as it is elegant. With a WaterShield High Performance Core and an AC5 rating, this flooring line is resistant to topical water, scratches, and stains and is robust enough for use in light to medium commercial spaces. Registered embossing adds realistic texture into each plank, producing the authentic feel of hardwood floors. Twelve colors varying from light tans to dark taupes encompass the wide range of hues found in natural European Oak. The Bella Vista Series is the ideal combination of sophisticated style and superior strength.

Old world charm comes together with innovative WaterShield Technology for the look of rustic reclaimed wood with incredible durability. The Olde Tavern Series is a high performance floor crafted to withstand topical water, scratches, and stains in all types of settings. With an Abrasion Class 4 rating these planks are sturdy enough for use in light to medium commercial spaces. This collection boasts a wide selection of twelve colors that showcases the natural shade ranges of reclaimed hardwood. Images are crisp and clear, while the textured surface mimics realistic wood grains through registered embossing (EIR). Luxury design complements unparalleled performance in Johnson Hardwood's Olde Tavern Series.

OUR COMMITMENT TO SUSTAINABILITY

Johnson Hardwood produces high quality; on-trend flooring that is selectively harvested from countries all around the world. Whether lumber is harvested from our own forestlands, or sourced from our supply partners, Johnson Hardwood is committed to supporting Sustainable Forestry Practices. Which means that we are dedicated to preserving healthy forest ecosystems, did you know that:

- 30 to 40% of our exotic lumber comes from aged or fallen timbers. Aging trees block the sunlight, and therefore limit the growth of younger, oxygen producing trees.
- Approximately 70% of our product line is engineered in construction. As compared to solids, this gives Johnson Hardwood a four to five times better yield on our valuable lumber.
- Our commitment to sustainable forestry practices that encompass not only the trees, but also the entire forest ecosystem.
- We employ a comprehensive supplier certification program for all sourced lumber. This helps to insure that our suppliers demonstrate their commitment to environmentally conscious timber procurement.
- We generate much of our steam/electricity requirements by burning our recycled wood scraps reducing our carbon footprint.
- We process 100% of our recovered sawdust into highly efficient heating pellets that are used by the local communities.
- Being a California based company, we strictly adhere to all local and state guidelines regarding waste disposal, recycling, building efficiency improvements, and proper fuel/chemical storage procedures.

Yes, we make beautiful floors, but did you know:

- The adhesive used in our engineered floors meets the stringent German E-1 standard for Formaldehyde emissions
- We use only water based finishes on all of our products.
- Johnson Hardwood engineered products are available, on a special order basis, with a core adhesive which meets the criteria for LEED IEQ 4.4, Low Emitting Materials.
- Johnson Hardwood realizes that environmental stewardship is our responsibility as a manufacturer, and is an ongoing process that continually needs to be improved upon.
